

One company serving libraries for over 30 years.

Library Automation • Authority Control • Cataloging • Online Selection and Acquisitions

The laptop screen displays the LS2 library automation software interface. The main content area shows search results for 'Narnia' with a grid of book covers and titles. A detailed view of a book is shown on the right side of the screen. The interface includes navigation tabs at the top, search filters, and a sidebar with 'LIBRARY PROMOTIONS' and a grid of promotional images. The background of the advertisement features a blue-tinted image of a woman working at a computer.

TLC
Solutions that Deliver

Our History

● 1974

TLC is founded by the family that owns and operates the company today.

● *The 1980s, and TLC is the:*

- first organization in the world to successfully apply CD-ROM technology to data storage.
- creator of the world's first multi-media CD-ROM OPAC.

● *The 1990s include:*

- the creation of integrated automation systems for libraries and school districts: Library•**Solution**® and Library•**Solution**® for Schools. (Library•**Solution** has earned TLC the accolade “number one company in new automation sales.”)
- cataloging that takes advantage of the features of Microsoft Windows® to streamline backroom processes.

● 2000

TLC acquires CARL Corporation, the developers of CARL•**Solution**, used by some of the busiest libraries in the world. (CARL•**Solution** has been succeeded by CARL•**X**, a next-generation ILS on a Unix® platform – offering the benefits of a large library system, without the cost.)

● 2005

TLC becomes a majority shareholder in Tech Logic, the first company to create automated material handling systems exclusively for libraries.

● 2006 introduces:

- **BiblioFile**®, a generational upgrade to the company's suite of cataloging tools.
- **Web Circ**, browser-based automation for schools and libraries.

● 2008

TLC announced plans for a new unified ILS platform called LS2 that will include Web, client, and mobile interfaces. TLC also released the first module of the new system: LS2 PAC. LS2 PAC offers experiences similar to those found in the best Web 2.0 applications.
